

**EUROPEAN PATIENTS STATEMENT**  
**20 April 2007**  
**REGULATION ON ADVANCED THERAPIES**

International Diabetes Federation

**EUROPEAN PATIENTS ARE WAITING**  
**SUPPORT THE COMPROMISE PACKAGE**  
**(PES, ALDE, GUE/NGL)**  
**TO ENSURE AN EARLY ADOPTION**  
**OF THE REGULATION**

As patients and families of patients affected by severe, heavily debilitating and often life threatening diseases, we, the undersigned, urge the Members of the European Parliament to support the compromise package of PES (Mrs Roth-Behrendt), ALDE (Mrs Ries) and GUE/NGL (Mr. Adamou) to secure an early adoption of the Regulation on Advanced Therapies.

This Regulation is urgently needed to guarantee that ALL patients from the 27 European Member States have timely and uniform access to Advanced Therapy Medicinal Products which have undergone a robust evaluation process at the European level.

The package proposed by PES, ALDE and GUE/NGL will ensure a first-reading agreement on the Regulation. Time saved will mean faster, easier and safer access to new, life-saving treatments for the patients of Europe.

Enough time has been lost already in the debate on this Regulation. We therefore call on all MEPs to **support the compromise package (amendments 82 to 156) and to reject all other amendments** which would yet again delay the adoption.

European Patients are waiting. With the compromise package, the Regulation on advanced therapies can be finalised.

**We urge you to act now.**
